Each logo design shown is available in the file formats listed below and includes both the official Lomanco full-color version and mono-color variants in black and in white, optimized for simplified applications. These logos are intended for use exclusively by authorized Lomanco customers and vendors to promote the 80th anniversary of Lomanco during the 2026 calendar year. Unauthorized use, alteration, or reproduction of these designs is strictly prohibited.

AI (.ai) – Adobe Illustrator

Master editable vector file used by designers. Ideal for making changes or exporting to other formats. Infinite scalability with no loss of quality.

PNG (.png) – Transparent Background

Web-ready image with a transparent background. Best for use on websites, presentations, and digital documents over any color.

SVG (.svg) – Scalable Vector Graphics

Ideal for web and app use. Lightweight and crisp on all screens. Can be scaled and edited with code or design tools.

EPS (.eps) – Print Vector File

Preferred format for professional printing and large-scale graphics. Compatible with most print software and retains vector data.

PDF (.pdf) – Portable Document Format

Easily shareable file format that retains layout and quality. Useful for sending logo proofs or for viewing without special software.

JPG (.jpg) – Compressed Image

Good for previews, mockups, and internal documents. Smaller file size but no transparency and may lose quality with editing.
